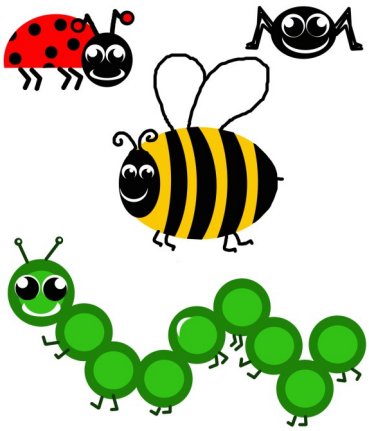
4-H STEM Fun Day

Saturday, June 18, 2016
1 - 4 p.m.
Ashland County Extension office

Open to all area families! You will have a chance to participate in the 4-H Honey Bee Challenge as well as build a bluebird house, learn about insects and grow some plants.

This activity is free thanks to the Ashland County 4-H Committee and support from the Ohio 4-H Ag Innovators. Join friends and family in lots of fun and educational science activities throughout the afternoon. **Reservations are requested and can be made anytime by calling OSU Extension at 419-281-8242**.



More about the Honey Bee Challenge: Participating youth will be challenged to connect honey bees to the foods they eat, as well as learning best management practices and foraging behaviors. They'll use bristle-bot platforms and modeling materials to explore honey bee habitats in various ecosystems and gain a broader understanding of the honey bees' role in growing food and feeding the world
